

12th March 2022

Ref: Y20-24-CSE(H) 2000031822

To organizations recruiting students for internships,

Sub: Letter of recommendation from the Head of the Department

This is a letter of recommendation for **Mr. VISHWAJEET SHARMA** with student ID:2000031822 currently pursuing 2nd year in four-year B.Tech. program offered by the department of Computer Science & Engineering at Koneru Lakshmaiah Education Foundation (KL deemed to be University). This student is aspiring for an Honors degree in CSE.

The student is competent in **C language** and I, as the HoD, rate the student in Programming Skills **7** on a scale of 10; in Front-End development skills (React, Angular, HTML5, CSS etc) **7** on a scale of 10; in Back-End development skills (Database Modelling & SQL) **8** on a scale of 10.

Student is proficient in Software Engineering / Elements of Software Construction among the core engineering courses.

Student has completed the following MOOCs courses successfully in addition to his academic work.

- Full-Stack Web Development with React
- Relational database systems

As part of their technical skilling, he has demonstrated proficiency while working on the following projects:

- Facial recognition attendance system, EPC(employment consultancy system) webpages

While working on the above projects, I can rate his Full Stack Development Skills as 9 on a scale of 10.

Mr. VISHWAJEET SHARMA is now trained at the fundamental level on both AWS and Azure cloud platforms and he is now ready to take up AWS Cloud Practitioner Certification and the Azure Fundamentals Certification.

Student has also undergone specific training in the following tool-based learning:

Cloud Skills.

This student has also demonstrated exceptional potential by working as a **Peer Mentor** in the 2nd Year where the responsibilities included but not limited to mentoring a group of nearly 20 students, designing lab experiments, participating in innovation challenges and building vlogs on topics of interest.

I strongly recommend Mr. VISHWAJEET SHARMA for an internship opportunity at your organization. If the student can report online with a work from home option, we do not have any restrictions on the duration of the internship. If the work demands them to be available on-site, then the student is available for the same from 15th May 2022 till 31st July 2022. If you wish to extend the work and require the student to continue further, we can always discuss the logistics and come up with a plan of action to let the student take up the extension as required.

Sincerely,

Hari Kiran V.

HARI KIRAN VEGE
Head of the Department
Computer Science & Engineering, KLEF
